Best Cough Medicine for Children.

"I am very glad to say a few words in praise of Chamberlain's Cough Remedy," writes Mrs. Lida Dewey, Milwaukee, Wis. "I have used it for years both for my children and myself and it never fails to relieve and cure a cough or cold. No family with children should be without it as it gives almost immediate relief in cases of croup." Chamberlain's Cough Remedy is pleasant and safe to take, which is of great importance when a medicine must be given to young children. For sale by all dealers.

COMPLETELY EXONERATED.

Sheriff Owings and Deputy Abercrombie have Little Difficulty in Greenville Court.

Sheriff John D. Owings and Constable J. C. Abercrombie, who went to Greenville Wednesday morning to go through the form of a trial for the killing of Lacy Glover in the lower part of Greenville county several months ago, were completely exonerated of all blame by the petit jury which heard the case. It will be remembered that these two officers were forced to shoot this negro on entering his house to arrest him in connection with the burning of the barn of Mr. M. B. McCuen, near Princeton, this county. Only three witnesses were placed on the stand Wednesday, one of them being the wife of the deceased negro. The evidence was so conclusive of self defense that Solicitor Bonham requested the judge to instruct the jury to bring in a verdict of not guilty and this was done.

His Stomach Troubles Over.

Mr. Dyspeptic, would you not like to feel that your stomach troubles were over, that you could eat any kind of food you desired without injury? That may seem so unlikely to you that you do not even hope for an ending of your trouble, but permit us to assure you that it is not altogether impossible. If others can be cured permanently, and thousands have been, why not you? John R. Barker, of Battle Creek, Mich., is one of them. He says, "I was troubled with heartburn, indigestion, and liver complaint until I used Chamberlain's Tablets, then my trouble was over." Sold by all dealers.

CORN CLUB PRIZES OFFERED FOR 1914

South Carolina Plans to Win Back Southern Record Lost in 1913.

Atlanta, Ga.—(Special).—Enthusiastic plans are already under way in Georgia, South Carolina and other Southern states for the 1914 corn club contests. These contests have increased the South's corn production by millions of dollars during the past few years.

H. G. Hastings, chairman of the agricultural committee of the Atlanta Chamber of Commerce, has renewed for 1914 his annual offer of corn club prizes in South Carolina and nine other Southern states. Mr. Hastings offers \$1,200 in prizes. Of this amount \$100 goes to South Carolina in three prizes of \$50, \$30 and \$20 each. These prizes are awarded under the direction of the United States government officials in charge of the farm demonstration work.

Word comes that the South Carolina boys are going to make a powerful effort this year to regain the Southern record, which they held in 1912, but which was taken away from them in 1913 by Alabama. The South Carolina record of 228 bushels, held by Jerry Moore, was beaten by 232 bushels, raised by Walker Lee Dunson of Alabama.

An interesting echo from last year's contest comes from Arkansas, where the \$50 prize, offered by Mr. Hastings, was won by a 14-year-old girl, Miss Delphine Moore, who competed against 2,400 boys, because there was no girls' club in the state.

The corn club work has made wonderful advances throughout the South. The fathers of the corn club boys, who first looked on the movement as a fad, have at last come to realize its great practical value and are now just as much interested as their sons.

SOMETHING GOOD FOR YOUR LIVER.

The most perfect Constipation remedy the world has ever known comes from Hot Springs, Arkansas. No matter what you have been taking to tone up your liver and drive poisonous waste from the bowels, the sooner you get a box of HOT SPRINGS LIVER BUTTONS, the sooner your liver, bowels and stomach will be in fine condition.

They are simply wonderful, splendid, they are gentle, sure, blissful. Take them for sick headache, indigestion, loss of appetite, etc., all druggists have them at 25 cents a box.

One of His Attractions.

A cynical young woman once said to me that she found cads more interesting than gentlemen, because you could always tell what a gentleman would do in a given situation, whereas you could never tell, in any situation, what a cad would do. Cads may or may not be the proper sport of cynical young women, but to the average busy creature the gentleman is wholly delightful in that he is wholly predictable.—Atlantic Monthly.

Relics of Past Wars.

Two ancient helmets have for some time been suspended in the parish church at Eye, Suffolk, England, and one of them has lately been pronounced a peaked helmet (closed helmet), probably of Italian work and dating from about 1510. Its value is about £210. The other helmet is a Spanish morion (open helmet), dating from about the time of the Spanish Armada (1588).

Parson's Soft Job.

"There is a prevalent idea among the criminal classes that the clergy have nothing whatever to do." The authority for this statement is the archdeacon of London, who has three large prisons in his archdeaconry. An old woman once said to a jail chaplain: "I wish you could find a job for my old man. He is not up to much, and cannot do anything, but he wants a soft job like yours!"—London Globe.

ALFALFA

Alfalfa is rich in feeding value.

TO PROMOTE ALFALFA.

Burlington to Run Combination Trains Through Southern Iowa and Northern Missouri—600 Alfalfa Lectures to Be Given in Two Weeks' Campaign—700 Automobiles to Be Used in the Work.

The Chicago, Burlington and Quincy railroad will run an alfalfa combination railway and automobile train for a two weeks' campaign, making about 60 stops in southern Iowa and northern Missouri, beginning July 28, 1913, from Des Moines.

The plan, as worked out by the Burlington in co-operation with the Agricultural Extension Department of the International Harvester Company of New Jersey and the agricultural colleges, is far in advance of any agricultural extension work ever carried on.

Will Stop at Sixty Points.

Local committees at each of the 60 points on the railroad will arrange for five to ten automobiles to carry the speakers in all directions into the country to farm homes, school houses and inland towns within a radius of from four to ten miles, where alfalfa lectures will be given.

During the campaign over 600 alfalfa lectures will be delivered by the party to as many audiences, and from 500 to 700 automobiles will be brought into the service of this great educational movement.

These campaigns are conducted on a strictly co-operative basis. The people will provide:

1st. A guarantee of at least five to ten automobiles at each railroad stop to carry the speakers to the points in the country where meetings are to be held.

2nd. Halls suitable for the central meeting in towns where train stops.

3rd. Any community desiring a campaign must send in a request to the railroad, agricultural college co-operating, or to the Agricultural Extension Department, signed by a representative number of farmers and business men.

The railroad will provide: Sleeping cars and dining service for the alfalfa campaign party, and baggage and exhibit cars, literature, etc.

The Agricultural Extension Dept. will provide:

1st. Speakers.

2nd. Assistance in organizing and advertising campaign.

3rd. Educational charts and other equipment for lecture purposes, bulletins, literature, etc.

4th. Follow-up men, when possible, to assist the farmers in getting a start with alfalfa.

Hearty co-operation on the part of the people is absolutely necessary to make these campaigns successful.

SAVE THE ALFALFA LEAVES.

Sixty Per Cent. of the Feeding Value of Alfalfa in the Leaves—Hay Should be Cut at Right Time and Cured so as to Preserve the Leaves.

Of the entire alfalfa plant, according to Kansas bulletin 155, the stalk comprises 60 per cent, and the leaf 40 per cent, whereas the quantity of the protein in the stalk is only 40 per cent, while the protein in the leaf is 60 per cent. Moreover only 20 per cent. of the fat is to be found in the stalk, while 80 per cent. is in the leaf. It is, therefore, very important that alfalfa be harvested at the proper time, and carefully handled so that all the leaves will be saved.

When possible to do so it is best to cut alfalfa late in the afternoon or evening. Dew or rain on the freshly cut alfalfa will not injure it. Where a tedder is used, it should be started in the morning as soon as most of the dew is off and before there is any danger of knocking off the leaves. It is often advisable to go over it more than once.

Alfalfa hay is harvested and cured in much the same way as clover, except that it should be cut as soon as the young sprouts or shoots start to grow at the base of the plant.

When alfalfa is left too long without cutting, the leaves fall off and the stems become woody, and the yield of the next crop is greatly reduced.

MONEY IN ALFALFA.

J. Otis Humphrey, judge U. S. District court, Springfield, Illinois: "You can grow alfalfa anywhere in the corn belt and the crop is worth \$50 an acre."

Joseph Wing of Ohio: "Alfalfa will pay any farmer 3 per cent. on \$500 an acre land."
